### Authentication keys

Client ID:78vqo6fomffoj5

Primary Client Secret:.....

Generate a new Client Secret

## OAuth 2.0 settings

Token time to live duration

Access token: 2 months (5184000 seconds)

Authorized redirect URLs for your app

https://brainsait.cloudflareaccess.com/cdn-cgi/access/callback

https://www.linkedin.com/developers/tools/oauth/redirect

## OAuth 2.0 scopes

- Scopes define what your app can do on a user's behalf.
- The OAuth consent screen will display descriptions to end users as they are seen below. Some variation may occur if your app has a custom OAuth experience.

**openid**

Use your name and photo

**profile**

Use your name and photo

**r\_events**

Retrieve your organization's events.

**w\_member\_social**

Create, modify, and delete posts, comments, and reactions on your behalf

**email**

Use the primary email address associated with your LinkedIn account

**rw\_events**

Manage your organization's events

Leave Feedback

## Understanding authentication and OAuth 2.0

In order for your applications to access LinkedIn member data and/or act on their behalf, they must be authenticated.

To make this process as easy as possible, LinkedIn relies on the industry standard OAuth 2.0 protocol for granting access.

Using [OAuth 2.0 tools](#) you can create new access tokens and inspect token details such as token validity, scopes.
